Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

Over the past 17 years, I've worked with students from diverse educational backgrounds, helping them navigate the complexities of chemistry. My experience spans across multiple international curricula, including IB Chemistry SL and HL, A-Levels, and IGCSE, ensuring students achieve top grades and develop a deep understanding of the subject.

In addition to my work with school-level students, I've also prepared university applicants for competitive entrance exams in chemistry, offering personalized support to help them succeed. Many of my students have gone on to study at prestigious universities across Europe, and I take great pride in helping them reach their academic goals.

Throughout my career, I've focused on providing clear, concise instruction, adapting lessons to meet individual student needs. Whether working with students on IB or AP Chemistry, I ensure they are fully prepared for exams and have a solid foundation in chemical principles.
